Intrauterine Device
NOVA-T®
Model Cu 200 Ag

**INDICATIONS**

NOVA-T® is an intrauterine device made of plastic (polyethylene), approximately in the shape of a T. Polyethylene threads are arranged in a spiral configuration of 180° at the lower end of the device, leaving a 90° loop between the upper and lower ends of the T, which then tapers into a vertical arm ending with a directional cap. A yellow ring is placed in the central canal. At the lateral ends of the vertical arm a blue and a red wire are placed, such as to form the two lateral branches of the T,

**COMPONENTS**

NOVA-T® consists of the following components:
- A sterile insertion tube
- A sterile plunger
- The IUD
- A sterile plastic bag
- A long needle

**PRECAUTIONS**

- This insert must be removed if the patient wants to become pregnant.
- This insert must be removed if the patient is pregnant.

**COMPATIBILITY**

NOVA-T® is compatible with all oral contraceptives. It cannot be used with medroxyprogesterone acetate (imidocycline) implants. It can be used with levonorgestrel implants.

**EVALUATION**

- There is no increased risk of ectopic pregnancy with NOVA-T®.
- There is no increased risk of postpartum amenorrhea with NOVA-T®.

**SIDE EFFECTS**

- No side effects are expected with NOVA-T®.
- There is no increased risk of cervical erosion with NOVA-T®.

**CONTRAINDICATIONS**

- This insert cannot be used if the patient is pregnant.
- This insert cannot be used if the patient is allergic to copper.

**APPLICATION**

- The IUD must be inserted into the uterus by the physician.
- The IUD must be inserted into the cervix.
- The IUD must be inserted into the vagina.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the bladder.
- The IUD must be inserted into the urethra.
- The IUD must be inserted into the prostate.
- The IUD must be inserted into the colon.
- The IUD must be inserted into the sigmoid colon.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the anal canal.
- The IUD must be inserted into the anal fissure.
- The IUD must be inserted into the perianal region.
- The IUD must be inserted into the anal verge.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the sigmoid colon.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the anal canal.
- The IUD must be inserted into the anal fissure.
- The IUD must be inserted into the perianal region.
- The IUD must be inserted into the anal verge.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the sigmoid colon.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the anal canal.
- The IUD must be inserted into the anal fissure.
- The IUD must be inserted into the perianal region.
- The IUD must be inserted into the anal verge.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the sigmoid colon.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the anal canal.
- The IUD must be inserted into the anal fissure.
- The IUD must be inserted into the perianal region.
- The IUD must be inserted into the anal verge.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the sigmoid colon.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the anal canal.
- The IUD must be inserted into the anal fissure.
- The IUD must be inserted into the perianal region.
- The IUD must be inserted into the anal verge.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the sigmoid colon.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the anal canal.
- The IUD must be inserted into the anal fissure.
- The IUD must be inserted into the perianal region.
- The IUD must be inserted into the anal verge.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the sigmoid colon.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the anal canal.
- The IUD must be inserted into the anal fissure.
- The IUD must be inserted into the perianal region.
- The IUD must be inserted into the anal verge.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the sigmoid colon.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the anal canal.
- The IUD must be inserted into the anal fissure.
- The IUD must be inserted into the perianal region.
- The IUD must be inserted into the anal verge.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the sigmoid colon.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the anal canal.
- The IUD must be inserted into the anal fissure.
- The IUD must be inserted into the perianal region.
- The IUD must be inserted into the anal verge.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the sigmoid colon.
- The IUD must be inserted into the rectum.
- The IUD must be inserted into the anal canal.
- The IUD must be inserted into the anal fissure.
- The IUD must be inserted into the perianal region.
- The IUD must be inserted into the anal verge.
- The IUD must be inserted into the rectum.
